GROSS TRANSPORT TANKS

The custom-made solution

Whether bottling, Oktoberfest or street festival – with GROSS transport tanks, beverages arrive quickly and safely. Custom-made for you: from planning to delivery.

Filling, transporting, connecting – it doesn't get any faster

We produce your stainless steel transport tank with screwed or welded insulation in your colour of choice. Your company logo and slogan can also be placed and attract attention. So the transport tank becomes an individual advertising space.

The fast solution for fast delivery

GROSS transport tanks can be easily loaded onto a trailer with a forklift truck. A GROSS longitudinal beam chassis is even faster and easier to handle. The chassis is specially adapted to the tank and offers perfect loading safety.

All tank connections are located in a lockable fittings cabinet. We equip each tank with fittings according to your specifications, e. g. for the connection of several taps with individual shut-off. This way the tank can be quickly connected to the consumers and the festival can begin.

The integrated consumption display provides an overview of the stock quantity at any time.

Our cleaning technology ensures clean interiors and connections

High-quality fittings for long-lasting operation

Five-way distributor with main and individual shut-off

Perfect insulation in your preferred colour
